# Universities & Campuses
Safer, Connected, Smarter Campuses

Gain insights and transform universities into secure, connected learning environments. With AI-powered monitoring, full Wi-Fi coverage, and adaptive lighting, campuses become safer for students and staff while enabling advanced research and innovation.

✓ Installed in hours – no construction, no new cabling

✓ AI at the edge – real-time decision-making with generative & agentive models

✓ Video, audio & environmental awareness – detect threats, crowding, noise, air quality

✓ Built-in Wi-Fi, 5G, and V2X – expanding connectivity

✓ Use existing infrastructure – upgrade light poles into intelligent assets

✓ Safer walkways and parking areas

✓ Campus-wide Wi-Fi for students and research

✓ Real-time monitoring of events and gatherings

✓ Track available parking and traffic flow management

✓ Research-ready data for AI, CV2X, and next-gen innovation

Smart Infrastructure Solutions, Outdoor Sensors, and Related Products and Services Contract

- Pre-negotiated pricing
- Faster procurement
